

Dear Power-Flo Family:

I am so proud of all the cooperation and teamwork that has been exhibited over the last year and a half as we have dealt with the terrible effects of Covid-19. We have had two deaths, Marc Macina and Danny Vargas. We have also had many people contract the virus and have permanent lung damage causing them to become permanently disabled. More recently we have had a few outbreaks among the unvaccinated that have forced us to shut down some operations.

I have the responsibility of providing and maintaining a safe work environment for over 300 families. I take this responsibility very seriously! The main culprit is unvaccinated people giving Covid-19 to other unvaccinated people! When these outbreaks occur, we are forced to quarantine the other exposed unvaccinated people in close contact with the affected. We are now being asked by our customers to only send vaccinated people to their sites. While most of us are vaccinated, we need to have everyone vaccinated to ensure a safe work environment. The companies are considering mandating vaccinations for all employees.

There seems to be a lot of misinformation about the vaccines circulating out there. I have attached a MythBusters Fact Sheet from Northwell Healthcare Systems for your information. Please review the information and get vaccinated. We are not interested in forcing people to get vaccinated but with the recent explosion of the Delta Variant cases it may come to that to keep us safe.

If you have any questions, please call me at any time to discuss.

Best Regards,

Jerry DiCunzolo
